

Gopack company produces a wide range of packaging machines and complete automatic lines, developed and designed according to the specific customer's needs. The Gopack production include different vertical and horizontal packaging machines which form, fill and seal various type of pack such as bags sealed on 3 sides, called "stickpack", pyramidal sachets, called "tetrahedron", bags sealed on 4 sides, pillow-pack, block bottom bag with 4 vertical seals, etc.

*UPA Rapid Midi with Multihead Weighers Dosing Unit*

*MULTITUBE powder machine 5 lanes with auger filler dosing unit*

The Gopack machines are able to pack any sort of product such as powders, granulates, liquids, pastes or single pieces and they are used in various sectors of goods such as Food, Pharmaceutical, Cosmetic and Chemical. Depending of the product to be packed, the machines can be equipped with appropriate dosing unit or combination of dosing units (volumetric dosing unit, auger filler dosing unit, linear scale dosing unit, multihead weighers dosing unit). Equipped with the latest technology, Gopack machines are designed to ensure high production efficiency and low maintenance.

*MULTITUBE Liquid Machine 8 lanes with Pick&Place for honey*

A further company strong point is represented by the production of complete automatic lines, in addition to single machines: highly personalized lines are developed according to the requirements of each client and of each specific market.
